(57) [Abstract]

[Objects of the Invention] This design aims at offering the panel dummy support which can attach a building-materials panel etc. in a ground pillar easily from indoor.

[Elements of the Invention] The corner of the ground pillar 3 is contacted in the panel dummy support 11 which has the base plate sections 12 and 13 of the second page crooked at 90 degrees of abbreviation, and in the side of this ground pillar 3, one base plate section 13 is \*\*\*\*ed indoors, it fixes in 19, and the edge section of panels 1 and 1 is fitted into the fitting crevices 17 and 18 of the both sides of the piece 16 of support of this panel dummy support 11.

---

[Utility model registration claim]

[Claim 1] the base plate which consists of the base plate section of the second page crooked at

90 degrees of abbreviation — this — from the piece of support which is set up from the base plate section of the second page, respectively, and has the panel edge fitting section on both sides — becoming — this — the panel dummy support characterized by preparing a tapped hole in the base plate section of the second page, respectively, and being attached in the corner of a ground pillar
